

**Because foam eyewear
should fit your workplace...
and your face.**

Dusty workplace? Fierce fogging? Meet the StarLite® FOAM Series. The new **StarLite® FOAMPRO®** takes protection to a new level, with **OptiFit™** foam technology. This unique, closed-cell foam lines the entire lens, with a tapered design that provides a better fit and improved seal around the eyes.

OptiFit foam was developed to meet the needs of varying facial profiles, reducing gaps with its graduated foam design. Plus, venting helps fight fogging. Not lacking in style, FOAMPRO features a light gray foam instead of a stark black to avoid that 'raccoon eye' look!

For another foam option, the original **StarLite FOAM** is lined just along the top and sides of the lens. It's an ideal product for drywallers, or anyone working around falling dust and debris.

Both products provide all the benefits of the original, industry-leading StarLite safety glasses, including UL-certified impact protection. Plus, all lens options come with our high-quality anti-fog coating, making them exceptional products to fight fog. **StarLite FOAMPRO** is even available in a MAG version, with 1.5 and 2.0 diopters!

Even a small particle blown into the eye can cause significant damage. Between **StarLite FOAM** and **StarLite FOAMPRO**, workers can find foam-lined eye protection — in the famous StarLite design — that they can count on.

Along with a comfortable fit, OptiFit™ foam helps to block dirt and debris from any angle.

46FM78	Gray	Gray fX2 Anti-Fog

StarLite® FOAMPRO® Features

- Comfortable, closed-cell foam lining around entire lens.
- OptiFit™ foam technology provides a tapered design, which creates a better fit and improved seal from dust and debris.
- Venting channels along the foam paired with our high-quality anti-fog lens coating provide superior protection from fog.
- Available in a MAG version, with 1.5, 2.0 & 2.5 diopters.
- All the benefits of the original StarLite, including light weight and UL-certified impact protection.

Tapered height provides better fit.

OptiFit™

Foam height increases near the edge of the lens, creating a more custom fit and better seal

Thicker foam at outer edge keeps debris out of the eye.

StarLite® FOAM Features

- Open-cell foam lining the top and sides of the lens blocks debris from above and absorbs perspiration.
- All the benefits of the original StarLite, including light weight and UL-certified impact protection.
