Around the corner screwdriving with the 393 S bitholding screwdriver. The flexible shaft allows to reach fixing screws in unfavourable positions. The ideal tool for srewdriving situations that are difficult to reach.

Tool set for the professional window builder

Compact Wera screwdriving tool set with the 35 most important tools for window construction. Socket and bit assortment in premium Wera quality, attuned to universal window construction applications. With 2 bit hand holders and 1 bit ratchet (which can also be used for sockets, if used with an adaptor).

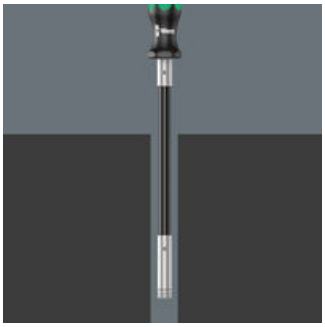
Flexible shaft

Around the corner screwdriving with the 393 S bitholding screwdriver. The flexible shaft allows to reach fixing screws in unfavourable positions. The ideal tool for srewdriving situations that are difficult to reach.

Secure hold and easy removal

Secure bit holding feature due to locking mechanism. With strong permanent magnet.

Slim bit holder 393 S



The particularly slim bit holder allows working in very tight work spaces.

The Zyklop Mini

The Zyklop Mini 1 mini ratchet allows particularly quick screwdriving, even in narrow work situations. With direct bit mounting. With the Wera 870/1 adapter (1/4"-hexagon to 1/4"-square head), ¼" sockets can also be operated.

Manual and machine sockets

The manual and machine sockets can be used both for hand and power tools use (non-impact). Users need just one socket set for all applications.

L-keys with holding function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw on the tool.
