Why is the right tool so often missing at the workplace? The reason: too many tools and overly-heavy tool bags can make it bothersome to carry keep them with you. So for us it was a clear challenge: to develop a tool that is suitable for a whole host of applications and can be easily taken along to the workplace. Our solution: Kraftform Kompakt tools. A handle into which blades with a range of different profiles can be inserted. Compactly and protectively housed in a light and robust textile pouch - and they are even VDE-tested, too.

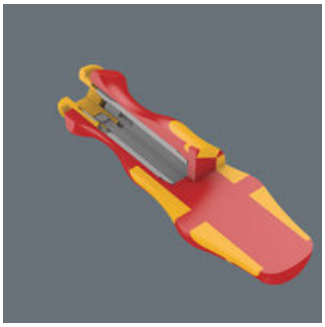
### The 837 i RA bladeholding screwdriver with ratchet functionality

The integrated ratchet with fine toothing (40 teeth and a return angle of 9°) eases and accelerates screwdriving without having to reposition the tool.

### Rapid screwdriving

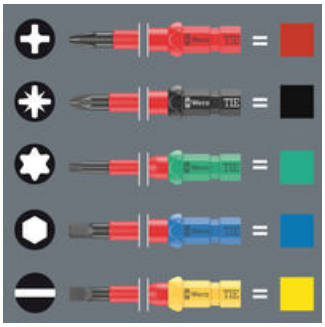
The ratchet mechanism also allows fast "spinning" while screwdriving.

### The 817 VDE bladeholding screwdriver



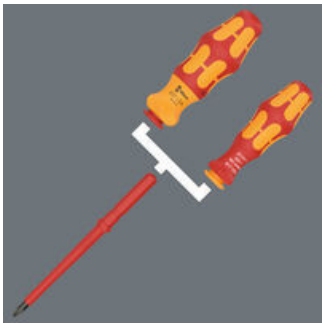
The bitholding screwdriver is suitable solely for Wera VDE blades. Kraftform Plus handle for comfortable ergonomic screwdriving, avoiding blisters and calluses. Hard handle zones for high working speeds, while soft handle zones guarantee a high torque transfer.

### Take it easy Tool Finder



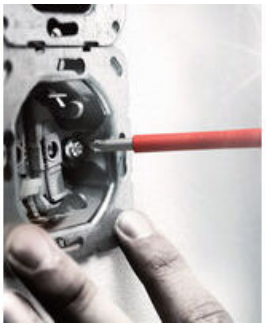
The Kraftform Kompakt VDE blades are equipped with the Take it easy Tool finder. The colour coding by profile and the laser-engraved size indication make it easy to identify the required tool quickly.

### Handle/interchangeable blade system



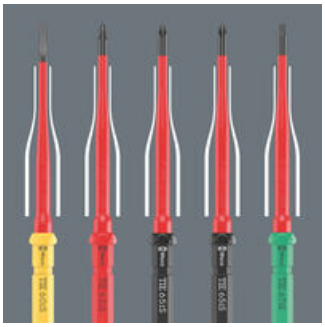
The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

### PlusMinus screwdrivers



For the use in terminal blocks, control cabinets, switches, relays, sockets etc.

### VDE interchangeable blade with reduced shaft diameter (iS)



Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.
